

***Kindergarden &
Schoolsports***

Dear customers,

people are in motion throughout their life: from childhood to old age, from the untrained to the high-performance athletes. We are convinced that movement is the medicine of the 21st century. Since 1956 our drive and passion is to develop and manufacture outstanding products in premium quality and excellent functionality.

From the initial idea, the applied design and raw materials, to the manufacturing at our own production site in Prien/Germany: compliance with our high premium quality standards is of prime importance. With TOGU, you choose durable products that are 100% recyclable, protecting natural resources and our environment. As a family business run by the third generation with a team of more than 100 employees, we are aware of the responsibility towards our employees, society and the environment. We work continuously with users and experts in science and medicine thus developing a comprehensive range of health products for more well-being in all stages of life.

In this selection you will find products that induce children intuitively to exercise. Playfully and with much joy, balance, coordination and proprioception are trained. We also offer this experience based on the motto „Try it - love it“ at the TOGU stand on many trade fairs and congresses.

Meet us and experience our products personally! You will find current dates at www.togu.de and www.facebook.com/togu.de. We are looking forward to your visit.

A handwritten signature in black ink, appearing to read "Vera Angelini" followed by a stylized flourish.

Vera und Giovanni Angelini

Aero-Step®

Aero-Step

The Aero-Step – made in Germany - for kids is fun balance training – also for small children and small feet. They learn to keep in balance while moving, promoting reaction and reflexes. They improve their attitude and incidentally, the ability to concentrate.

coordination, increase reaction.

With an air-filled twin-chamber system training becomes a varied experience with great fun guaranteed.

The device is equipped with many round knobs for perception and improve circulation. It can be used for school sport, therapy or simply at home.

With AGR-quality-seal

Art.No.:	Colour:
400429	blue, green, red
Size:	46 x 32 x 8 cm
Packing unit:	4
Contents:	in deco-box with exercise poster
Material:	Ruton
Max. Load:	ca. 200 kg

Air Parcours

Air Parcours – made in Germany – is an air-filled balance set consisting of TOGU classics and new items for children. Guaranteed movement and dynamics within the hour. High level of sensorimotor stimulation. While moving through the air parcours the kids are challenged to keep their balance. This is fun and trains coordination, promotes flexibility and their ability to concentrate. The Air Parcours are extremely robust, durable and washable. Essential for kindergartens, schools and clubs.

TOGU Air Parcours small: 2 Senso Balance Bar blue, 1 Dynair Kids assorted, 2 Senso Balance Igel green, 1 Jumper mini red;

TOGU Air Parcours large: 2 Senso Balance Bar Blue, 2 Dynair Kids assorted, 2 Senso Balance Igel Green, 1 Jumper mini Red, 4 Dynair Minis 20cm assorted

Packing unit:	1
Contents:	in deco-box
Material:	high quality GFK-PP
Max. Load:	120 kg
Specials:	3 difficulties

Balanza®

Balanza® Freeride

Balanza® Kids Seesaw

Balanza

Stabilization and coordination training for competitive and high performance sports training in a new and challenging dimension. TOGU Balanza allows to conduct a holistic training in several levels. Below the specific plate made of stable wooden material a robust and durable air-filled ball is mounted. This enables the user to train through the dynamic instable surface and target the stabilizing muscle groups and joint protecting effects. In contrast to usual therapy boards the standing area is like floating supported suspension. This allows a multidimensional shift during the training.

For stabilization and coordination exercises in standing positions (one and two leg) in combination with or without additional training tools as rope pulls. Ideal also for propped positions as push ups because of the handles. Setting new training stimuli.

For therapy and training in competitive and high performance sports.

EU Patent No. 25 811 17

Art.No.:	Colour:	ca. Size:	Packing unit:
410410	red with wood	ca. 55 x 35 x 7 cm	1
Contents: TOGU Balanza: in a box, instructions, pump			
Max. load: ca. 150 kg			

Balanza Freeride

The Balanza for everybody who wants to train power, coordination and balance in a versatile and effective way. Perception, sensori-motor function and stability can be activated and increased. Unique in comparison to usual balance boards is the kind of floated suspension by using air-filled balls below the plate. Each ball can be adapted easily by using a needle ball pump.

A balance that makes you fit. Ideal for everybody who loves board and freeride sports, and wants to be prepared for the upcoming season.

Art.No.:	Colour:
440410	birch wood with a red balls
Size:	ca. 100 x 30 x 14 cm
Packing unit:	1
Contents:	in a box with instructions and pump
Material:	Balls: Ruton; Plate: 100% birch wood
Max. load:	ca. 200 kg

Balanza Kids Seesaw

The portable seesaw! Use indoors, in the garden or in day care centers. It has a magic attraction to children because of its stimulative nature, while at the same time it helps to practice coordination and balance. Due to its well devised base made of resilient balls, a three-dimensional seesaw experience provides training for stabilization and rhythm.

In addition there is a social learning component as the seesaw can only be operated through the teamwork of two children.

The seesaw is entirely being manufactured in Germany and is made of a birchwood plate which features leather straps as handgrips. The four balls, which are attached in a durable way through a special screw connection to the wooden plate, consist of the safe and resilient material Ruton. Each of these balls can be individually adjusted with a pump and a needle, which both come with the product. The Balanza Kids Seesaw is easy to clean and therefore perfectly suitable for the use in kindergarten and daycare centers.

Art.No.:	Colour:
440420	red with wood
Size:	ca. 120 cm x 50 cm x 41 cm (L x W x H)
Packing unit:	1
Contents:	instructions for use and pump
Material:	Ruton and wood

Brasil „Bewegungsprofi“-Set

The educators of KNS – the gym, sports and dance academy – developed the new motion programme „Bewegungsprofi“ especially for schools. The fun mobility break takes 10 to 15 minutes and trains the students not only physically but mentally as well and increases their concentration and motivation. Central part of the programme is the TOGU training tool „Brasil“.

Dynair Wedge Ballkissen Kids

For every kid in school and or at home during homework. Kids can move freely without losing concentration while seated. All advantages of the legendary ball cushion and a wedge cushion put into one. Supports upright posture. Enough room for leaning forward.

Art.No.:	Colour:
400140	red, green, blue, turquoise, yellow, pink, pearl
Size:	33 cm
Packing unit:	5
Contents:	in deco-box with exercise poster and pump
Material:	Ruton
Max. Load:	200 kg

Dynair Extreme

Sit on it and feel good. Brings you automatically in a upright and healthy position. The Dynair Extreme is the most recent and largest member coming from the Dynair family. With a diameter of 80 cm and a height of 18 cm it is perfectly suited as a meditation pillow and seat cushion. Smooth vibrations are being absorbed immediately by the cushion and emitted to the spine. In order to keep up a calm seating position small adjusting moves have to be made all the time, thus becoming a challenge for the spinal muscles and trunk muscles. Furthermore spinal training and exercises for improving trunk stability can be carried out perfectly in a dorsal or ventral position. Like all Dynair ball cushions, the Dynair Extreme is equipped with our well proven knobs on one side and with a smooth and soft surface on the other side. Therefore the Dynair Extreme suits also extremely well as a therapy cushion for certain disease patterns such as paresis, sensoric and motoric deficits or neurological and muscle dysfunctions.

TOGU® Reactionball

TOGU Reactionball

Start to train speed and reaction ability with the TOGU reaction ball - made in Germany. At each landing the ball bounces in another direction. Improves also the eye-hand coordination. Just drop or throw the reaction ball to the ground and then try to catch it again. The special shape makes the jump direction unpredictable. Each repetition is a new challenge for you.

Unlike other reaction balls the TOGU reaction ball has a valve and therefore the degree of difficulty can be regulated additionally with a ball pump. The material Ruton is extremely resistant, durable and 100% recyclable.

411000	ruby-red	100 cm

Packing unit: 1

Contents: box

Material: Crylon

Max. Load: up to 250 kg, ABS guaranteed 45 kg

Touch-Ball

Touch-Ball

The Touch ball - made in Germany - with its round, soft knobs stimulates blood circulation smooth and gently, and is ideal for users with sensitive perception. By air regulation via an integrated valve, the internal pressure can also be adapted to the needs of the individual user. Kids will love the touch ball because it is so easy to grip and catch.

It is available in five different sizes: ca. 8 cm, 9 cm, 10 cm, 16 cm and 18 cm Ø.

Art.No.:	Colour:	Size Ø ca.:	Packing unit:
460080	yellow	8 cm	100
460090	red	9 cm	50
460100	blue	10 cm	50
461620	red, blue, yellow	16 cm	20
461800	pink, purple	18 cm	15

Contents: Shipping box

Material: Ruton
