# BAUERFEIND – BY PEOPLE FOR PEOPLE. FOR A BETTER QUALITY OF LIFE.

Bauerfeind AG is one of the world's leading manufacturers of medical aids. With our products, we enable people to be more active and thus make an important contribution toward maintaining and restoring health.

## MEDICAL KNOW-HOW AND TECHNICAL EXPERTISE

Bauerfeind combines decades of expertise in technology and manufacturing with innovation: the tradition of a medium-sized, family-run business with a global mindset. Our specialists have worked very closely with physicians, scientists and developers right from the start. The result: patented, award-winning products and services.

## EFFECTIVE VARIETY

We have taken on the mission of using modern orthotic blanks to make leading an active and pain-free life a reality, even well into old age. The products have been tried-and-tested on the market for many years and they are characterized by unique material properties.

Orthopedic foot orthoses relieve and stabilize the feet, knees, hips, and back. They have a biomechanical effect, helping the foot to function naturally. Pain can therefore be alleviated, mobility improved, and the overall quality of life increased.

## UNCOMPROMISING QUALITY

Bauerfeind products don't simply meet standards – they fulfill the most stringent requirements when it comes to quality, effectiveness and wearing comfort. This is confirmed by regular inspection procedures, for which our products are permitted to bear the seals and marks after successful testing. Our orthotic blanks are developed and manufactured in Germany.

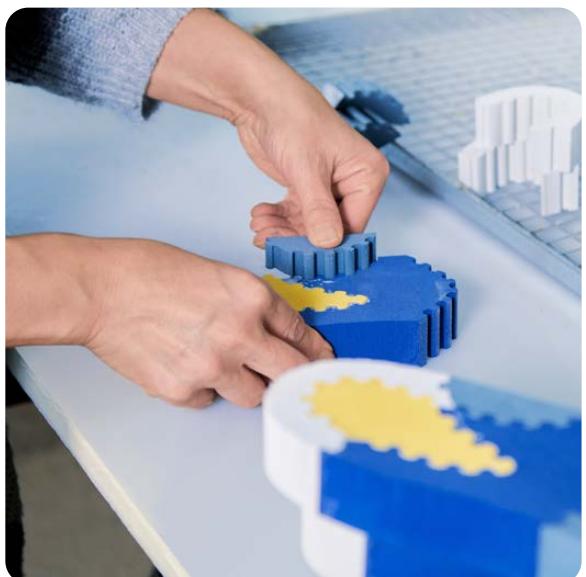

## FROM THE DEVELOPMENT PHASE RIGHT THROUGH TO INDIVIDUAL ADJUSTMENT

Medical aids can only be 100 % effective if they fit properly. As different feet need different types of support, Bauerfeind offers numerous different types of foot orthoses, to cater for every requirement.

## SERVICE GUARANTEES FOR MEDICAL RETAILERS IN GERMANY

### CUSTOMER SERVICE FOR FOOT ORTHOSES

Benefit from our expertise and get advice.

We are available by phone from 8.00 a.m. to 6.00 p.m. from Monday to Friday. You can reach us 24 / 7 by e-mail and fax.

**T** +49 (0) 800 0 01 05 30  
**F** +49 (0) 800 0 01 05 35  
**E** [info@bauerfeind.com](mailto:info@bauerfeind.com)

#### SHIPPING ON THE SAME BUSINESS DAY

If you place your order by 3.00 p.m., we will ship in-stock items on the same day (large orders excluded). We are happy to accommodate your express delivery requirements, too.

#### FREE TELEPHONE AND FAX HOTLINES

We are happy to help you!

#### 100% SERVICE AVAILABILITY

As competent contact partners, we are available by phone from 8.00 a.m. to 6.00 p.m. from Monday to Friday. You can reach us around the clock by fax, e-mail, or via electronic order systems (except in the event of system faults and maintenance work).

#### ELECTRONIC ORDER SYSTEMS

Place your orders easily, quickly and with reduced shipping costs: Using wheel-it or the various functions available in our online shop, such as the order status and availability display.

#### EXPRESS MANUFACTURE FOR QUICK CARE

Urgent, individually modeled milled foot orthoses – without intarsia – that are ordered before 10:00 a.m., will be completed and shipped on the same business day.

#### PRECISE DELIVERY DATE

We will specify a precise delivery date for your orders.

#### NO SHIPPING COSTS

We do not charge any shipping costs for order values over € 200 or for custom-made solutions. You can include all items from any of the product ranges in a single order.

#### FREE GOODS COLLECTION

If you fax us a completed return form, we will come and collect the goods to be returned (subject to inspection) – at our own expense.

#### 365 DAY RETURNS

In accordance with our General Terms and Conditions, we will accept returns of stock items in faultless condition within 365 days following delivery.

#### RETURNS PROCESSED WITHIN FIVE DAYS

We will process your returns within five working days of receiving the goods.

# BAUERFEIND ACADEMY

## COMPETENT. GOAL-ORIENTED. SUCCESSFUL.

Would you like customers to clearly favor your medical retailer and reward your team's know-how?

We will be happy to support you!

We offer qualified training with strong practical relevance all over Germany, with personal attendance or online, for the following categories:

### MEDICAL KNOW-HOW AND TECHNICAL EXPERTISE

"Basic foot orthosis training"

### MARKETING / SALES

"The successful sale of medical products"

### SPECIALIST SUBJECTS

"Workshop on digital orthotic care with Bodytronic ID:CAM"

### HUMAN RESOURCES

"Specialist medical supply retailer for career changers and young professionals"  
"Trainee camp"

Learn in your own time, independent of location, with our online courses.

[bfzr.de/2-online](http://bfzr.de/2-online)

For the complete training program, see  
[bfzr.de/2-akademie](http://bfzr.de/2-akademie)

Further information and registration forms are available from your sales representative or the Bauerfeind Academy:

## BENEFITS AT A GLANCE

### **+** TRAINING WITH STRONG PRACTICAL RELEVANCE

The training sessions offered by our academy will always include medical information to improve understanding and ensure increased technical expertise. Well-qualified trainers, such as orthotists, physical therapist and lymph therapists, will provide professional guidance through the different subjects, always considering the relevant target group.

### **+** IN-HOUSE TRAINING SESSIONS ACCORDING TO YOUR SPECIFICATIONS

Are you interested in personalized training that is tailor-made to your specific requirements? You can book your training session according to your specifications. You choose the subject, the location and the time. Get in touch!

### **+** CERTIFICATION

Our training sessions are certified in accordance with IQZ and AGOS.

### **+** BODYTRONIC EXPERT ADVISOR – OUR SPECIAL TIP

Become a "Bodytronic EXPERT ADVISOR" and convince your customers with digital measurement systems for your everyday customer service. Learn how to integrate digital measurement technology into consultation and sales, effortlessly and with confidence. You can measure discerning customers to provide products with a perfect fit and impress them with sophisticated technology.

# QUALITY THAT CAN BE MEASURED – AND MADE TO MEASURE.

## BAUERFEIND MEASUREMENT TECHNOLOGY

### TOUCHPOINT THE ATTRACTIVE CONSULTATION STATION

- For straight-forward visualization and optimum treatment comfort
- 2D Rothballer scanner
- Quick measurement of the sole of the foot
- Documentation for traditional provision of care
- The recorded data can be used for the BODYTRONIC ID:CAM web application to model milled orthoses

### BODYTRONIC® 140 THE DIGITAL BLUEPRINT

- 2D Rothballer scanner
- Quick measurement of the sole of the foot
- Suitable for mobile use as well as in-store
- Documentation for traditional provision of care
- The recorded data can be used for the BODYTRONIC ID:CAM web application to model milled orthoses

## BODYTRONIC® 610

FULL-BODY SCANNER TO SUPPLY PRODUCTS FOR ALL EXTREMITIES

- Contact-free measurements to supply medical compression stockings, knee and ankle supports, knee orthoses as well as products for the back, arm and shoulder without the need for special measurement clothing
- Three-dimensional measurement of foam imprints; the recorded data can be used for the BODYTRONIC ID:CAM web application to model milled orthoses

## BODYTRONIC® 150

WIRELESS MEASUREMENT OF DYNAMIC FOOT PRESSURE

- Insole measurement system by Medilogic
- For measuring dynamic pressure distribution across the sole of the foot
- For identifying the heel-to-toe movement and the body's center of gravity in the shoe
- Complete freedom of movement during the analysis, thanks to wireless use

## BODYTRONIC® 410

PORTABLE 3D SCANNER

- Contact-free measurement to supply foot orthoses, with no need for special measurement clothing
- Three-dimensional measurement of foam imprints
- The recorded data can be used for the BODYTRONIC ID:CAM web application to model milled orthoses

# THE TECHNOLOGIES ADAPTED TO SUIT THE ANATOMY AND SYMPTOMS OF THE FEET

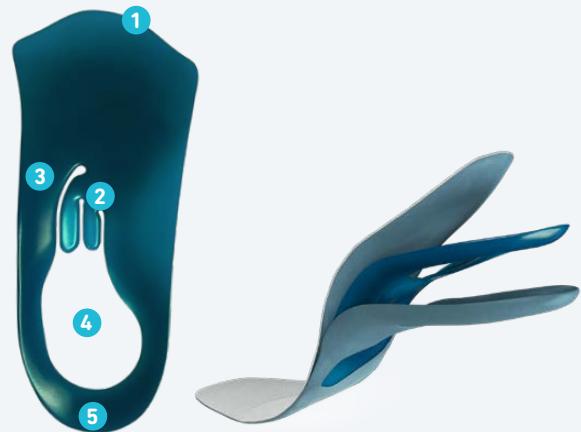

## WIDESPREAD RELIEF

This technology targets anatomical weak points in the case of chronic heel and ankle pain or calcaneal spurs. The cut out provides relief for the heel area. The fan design relaxes the irritated area of the plantar aponeurosis. The core supports the foot arches, thus taking the excessive strain off the tendon.

RELIEF CORE  
TECHNOLOGY

- 1 **Anatomically contoured with thin tapered edges:** Ensures the MTP joints are positioned outside the core, avoiding any disruption of the heel-to-toe movement.
- 2 **Fan-shaped cuts:** Relieves pressure on the fascia and tendon structure in the sole of the foot.
- 3 **Arch support:** Raises flattened foot arches, thereby removing one of the causes of pain.
- 4 **Cut out:** Relieves according to pathophysiological characteristics.
- 5 **Heel cup:** Guides the foot with each step and promotes a biomechanically correct gait.

## YOUR PERSONAL TOOLBOX

Using the Bodytronic ID:CAM system solution, milled orthoses can be modeled to offer a perfect, individual fit.

BODYTRONIC®  
ID:CAM

### + PROFITABILITY

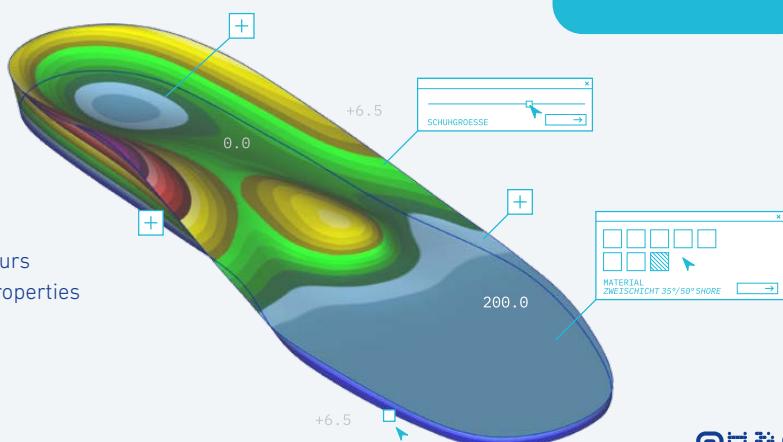

- Free web application
- No maintenance or operating costs
- No need for your own materials warehouse

### + QUALITY

- Made-to-measure products in only 48 hours
- Precisely milled orthoses with surface properties that require little modification
- A reliable service for your customers

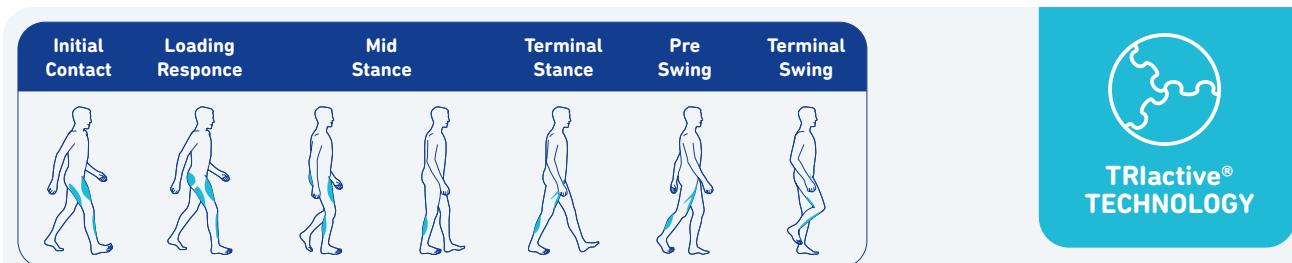

### + EFFICIENCY

- The perfect solution for every team
- Complete, workload-independent flexibility
- Intuitive operation and user interface

Try now at  
[idcam.bauerfeind.com](http://idcam.bauerfeind.com)

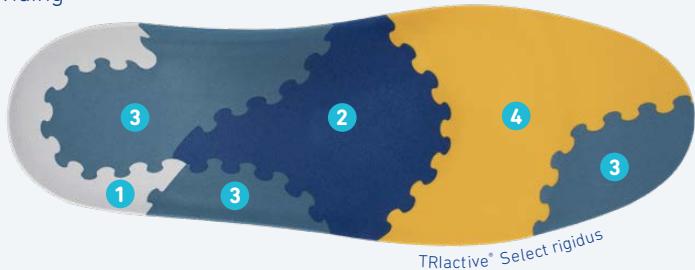

## A CLEVER CONNECTION

The TRlactive Technology uses a vertical serration system to combine materials with varying degrees of density, thus providing ideal support during every phase of walking.

- 1 **Guidance zone** 45 Shore
- 2 **Support zone** 35 Shore
- 3 **Cushioning zone** 25 Shore
- 4 **Functional zone**

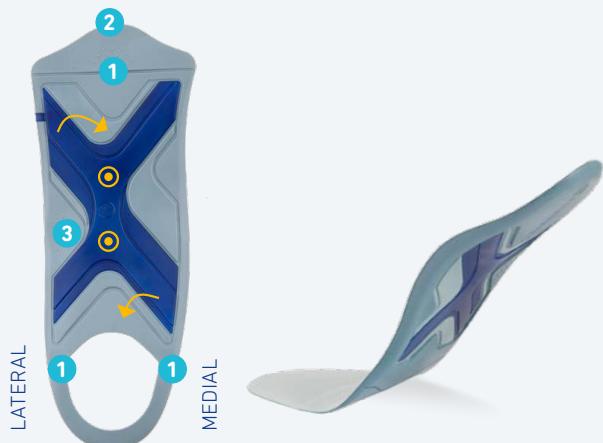

## TRANSMISSION OF FORCE WITH THE X FACTOR

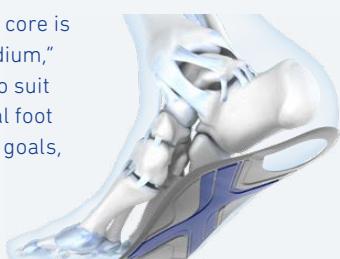

The "weightflex-X" integrated in the orthotic core supports the internal dynamics and torsional stability of the feet. The side sections guide occurring forces over two pivot points. The exchange of force supports the natural heel-to-toe movement of the feet and corrects the gait.

- ➡ Supports the inward rotation of the forefoot
- ➡ Pivot points of the "weightflex-X"
- ➡ Supports the longitudinal arch

- 1 Hinge joints make the orthotic core bendable, so it can be adapted to suit a variety of heel heights.
- 2 The edging is anatomically contoured, leaving the metatarsophalangeal (MTP) joints free. The edges are thin.
- 3 The base of the fifth metatarsal bone is lower to provide relief. This takes into account the biomechanical requirements of this part of the foot.

The weightflex orthotic core is available in "soft," "medium," and "strong" versions to suit each patient's individual foot conditions, therapeutic goals, and body weight.

## SUITABLE FOR VARIOUS HEEL HEIGHTS

Whether you are wearing ballet flats or heels – thanks to the integral hinges in the forefoot and heel areas, the orthotic core easily adapts to any heel height up to 6 cm.

# SPECIFIC TREATMENT FOR STANDARD SYMPTOMS\*

## Symptoms:

### DIABETIC FOOT SYNDROME

Diabetic foot syndrome is a secondary disease in patients suffering from diabetes mellitus. As the condition progresses, sensitivity reduces increasingly, and they feel less pain in their feet. That is why they notice pressure points too late or not at all. Wounds can then develop that become painful and infected. If these are not treated, they may result in permanently open wounds.

## What can be done:

Foot orthoses with soft cushioning can perfectly distribute across the entire sole of the foot, pressure that occurs in specific areas during walking and standing. This can protect toes and the balls of the feet from pressure points. This reduces the risk of pressure ulcers and injuries.

## We recommend:

- ErgoPad ID:Diabetes

### CHRONIC HEEL AND ANKLE PAIN

Chronic heel and ankle pain is very uncomfortable and occurs as soon as load is put on the heel. The tendon insertion on the heel bone is often irritated or inflamed because of excessive strain. Excessive tension on the heel bone's plantar tendon can result in a thorn-like protrusion on the bone – the heel spur.

Graphic representation

Specifically adapted orthopedic foot orthoses can help with chronic heel and ankle pain. They surround the heel and provide support while the painful area features a cut out and particularly soft cushioning. This provides relief and alleviates pain immediately. Potential inflammation can then be reduced in the long term.

- ErgoPad redux heel
- TRIactive Select heel

- GloboTec Comfort FS
- ViscoHeel, ViscoHeel K
- ViscoSpot
- ViscoPed, ViscoPed S
- GloboTec Comfort style heel
- ErgoPad work:h
- ErgoPad work:h<sup>+</sup>

### OSTEOARTHRITIS OF THE KNEE

Osteoarthritis of the knee is a slowly progressing process that manifests with knee pain when subjected to strain, such as taking the stairs, walking on uneven terrain, or carrying heavy loads. Pain behind the kneecap after extended periods of sitting, increased sensitivity in damp or cold weather, and crunching sounds when moving the knee are also typical.

Graphic representation

In order to alleviate pain caused by strain and to allow activity, the leg axis can be corrected using specific foot orthoses, thus relieving the affected joints. To this end, the foot orthosis features either a raised inner or outer edge. This distributes load on the joint, meaning pain during activity can be reduced significantly. In addition, the foot is guided during the heel-to-toe movement.

- TRIactive Select OA
- GloboTec Soft
- ErgoPad:ID

### HALLUX RIGIDUS AND HALLUX VALGUS

If the metatarsophalangeal joint is partly or fully impaired in its mobility, the natural heel-to-toe movement of the foot will be affected and cause severe pain. A joint condition (hallux limitus), a misalignment (hallux valgus), or complete stiffening of the joint (hallux rigidus) are often the cause.

Graphic representation

A supporting orthopedic foot orthosis with what is known as a rigidus spring removes pressure from the painful joint when the foot is put down and reinforces it at the same time to restore natural movement. The metatarsophalangeal joint is effectively relieved and immobilized.

- ErgoPad redux hallux
- GloboTec Comfort style hallux
- ErgoPad:ID
- TRIactive Select rigidus
- TRIactive Comfort rigidus

### RHEUMATISM

The feet of patients suffering from rheumatism are often swollen or even stiff. Contact or movement hurts and the skin over the joints is very sensitive.

Soft-cushioning foot orthoses provide feet affected by rheumatism with a comfortably soft contact surface. Feet sensitive to pressure and impact are noticeably relieved. Additionally, soft-cushioning foot orthoses support the foot arches, thus promoting the natural heel-to-toe movement of the foot.

- GloboTec Soft

A photograph showing a person's lower legs and feet. They are wearing white leather brogue espadrilles with black and white striped soles. The person is leaning against a light-colored wall, and their legs are crossed. They are wearing dark blue shorts with thin white stripes.

# ErgoPad® weightflex

## ErgoPad® weightflex 2\*

Comprehensive information relating to weightflex technology can be found on page 13.

WEIGHTFLEX®  
TECHNOLOGY

### ErgoPad® weightflex

#### USES

- Stable support for mild to pronounced flat foot and splay foot as well as mild high-arched foot
- Available for strong, moderate and gentle support of the foot
- Suitable for business and leisure shoes with a heel height of up to 6 cm

### ErgoPad® weightflex 2\*

• Cushioning layer	• Coated with high-quality polyurethane soft foam
• Microfiber top cover	• Fabric top cover
	• Stimulates the muscles through sensorimotor spots in the PUR surface

#### FEATURES

- Supports the foot arches
- Lowering at the base of the fifth metatarsal bone
- Cores in three different levels of density (soft, medium, strong)
- Supports the natural torsional movement of the foot
- Can be adapted to suit various heel heights by means of hinges in the front of the core area and at the heel
- Low construction height
- A choice of narrow or wide cores and foot orthosis contours

#### INFORMATION

• To be ground on the sides (at least 2 mm distance from core)	• Cutting along the marked line creates a ¾ or a short-sole version
--	---

• Easy to glue (standard workshop adhesives)	
--	--

#### MODIFICATIONS

• Orthotic cores are thermo-formable at 80 to max. 100 °C (warming in a water bath is recommended)	• Complete thermoplastic molding possible (oven set to 90 °C, approx. 2 minutes)
--	--

• When modifying the orthotic core, we recommend that you apply a top cover (e.g. made from microfiber or leather)	
--	--

#### CLEANING / CARE

• Surfaces can be wiped clean using a mild cleanser and a sponge
• Not machine-washable
• Do not expose to direct heat (heater, direct sunlight)
• We recommend that the functional properties are checked after six months

Applies for both foot orthoses versions

# GloboTec® Comfort

**GloboTec® Comfort, style**  
The smart solution

**ITEM NUMBER**  
3 12350 5 87210\*\*

## USES

- Moderate support for flattened or slightly raised foot arches with limited space available inside the shoe
- Ideal for customers / patients who are using foot orthoses for the first time
- An efficient, modern product that comes in a range of different versions and is easy to adapt
- Suitable for business and leisure shoes

## FEATURES

- Semi-elastic orthotic blank
- Flexible and soft edges
- Low construction height, available in long-sole and short-sole versions
- High level of wearing comfort thanks to moderate foot arch supports
- Selected models feature a stabilizing heel half-cup

## INFORMATION

### MODIFICATIONS

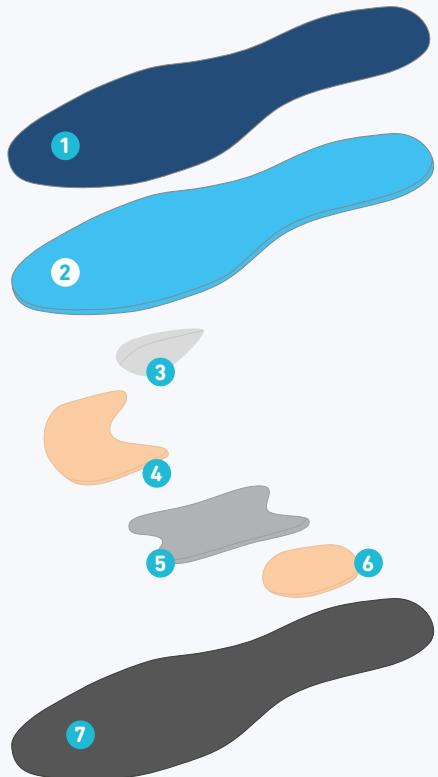

- Partially or completely thermo-formable (hot air blower or oven, 110 °C, approx. 20–30 sec. for partial thermo-forming, approx. 2 min. for complete thermo-forming)
- Easy to grind (grinding belt, grit 60–100, polishing brush on the blade disk)
- Easy to glue (standard workshop adhesives)

### CLEANING / CARE

- Surfaces can be wiped clean using a mild cleanser and a sponge (except leather top covers)
- Not machine-washable
- Do not expose to direct heat (heater, direct sunlight)
- We recommend that the functional properties are checked after six months

## GloboTec® Comfort, style THE DESIGN IN DETAIL

- 1 MICROFIBER TOP COVER**  
provides a comfortable contact surface for the foot
- 2 CUSHIONING LAYER**  
long-sole soft bedding in the "individual solution" and "soft solution" models
- 3 METATARSAL PAD**  
supports the natural arch of the foot behind the metatarsophalangeal joints (not available for "individual solution" model)
- 4 FOREFOOT CUSHION**  
provides soft bedding for sensitive feet (not available for "individual solution" model)
- 5 BUTTERFLY CORE**  
supports the arch of the foot
- 6 HEEL CUSHION**  
ensures a soft tread
- 7 BOTTOM COATING**

# ErgoPad® redux heel

## ErgoPad® redux heel 2\*

Comprehensive information relating to Relief Core Technology can be found on page 12.

**ErgoPad® redux heel**

**ITEM NUMBER**

3 12450 5 00000\*\*

**ErgoPad® redux heel**

- Suitable for standard and comfort shoe shapes
- For the effective treatment of chronic heel and ankle pain, plantar fasciitis and plantar calcaneal spurs
- For preventing chronic symptoms
- For supporting flattened or slightly raised foot arches
- With high-quality multi-layer cushions
- Available with a glued or unglued cushion layer

**ErgoPad® redux heel 2\***

- Suitable for shoes with limited space inside
- Coated with high-quality polyurethane soft foam
- Requires little modification
- Low construction height

**USES**

**FEATURES**

**INFORMATION**

**MODIFICATIONS**

**CLEANING / CARE**

- Cushioning in the painful, pressure-sensitive heel area
- Synthetic orthotic core with hole notches and an intelligent fan design for relieving the plantar aponeurosis

- Easy to grind (grinding belt, grit 60–100, polishing brush on the blade disk)
- Cutting along the marked line creates a  $\frac{3}{4}$  or short-sole version

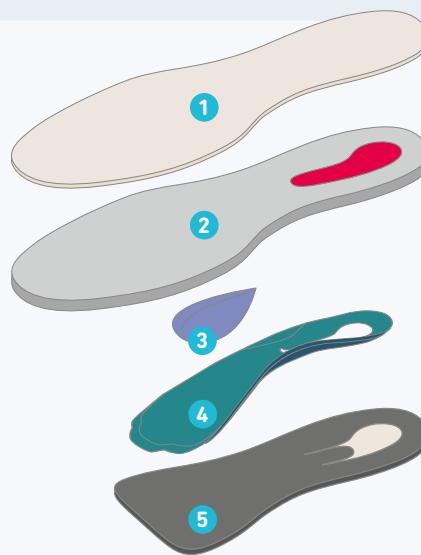

- Easy to glue (standard workshop adhesives)
- The separate top layer allows the metatarsal pads to be freely positioned and makes modifications possible

- Thermo-formable (oven set to 110 °C, approx. 5 minutes)
- Surfaces can be wiped clean using a mild cleanser and a sponge
- Not machine-washable
- Do not expose to direct heat (heater, direct sunlight)
- We recommend that the functional properties are checked after six months

Applies for both foot orthoses versions

# ErgoPad® redux hallux

## USES

- Primarily suited for non-surgical (pre-operative and post-operative) treatment of hallux limitus and hallux rigidus (stiffening of the big toe)

## FEATURES

- Designed to limit painful movements in the first metatarsophalangeal joint (MTP 1)
- A viscoelastic reinforcement element can be applied on one side (right or left, with the opposite side flexible) or on both sides
- The reinforcement element supports the entire forefoot (preventing forefoot misalignments)
- The ball of the big toe lies freely and is more deeply embedded
- Shock-absorbing PUR cushion layer (2 mm)
- Low construction height

## INFORMATION

### MODIFICATIONS

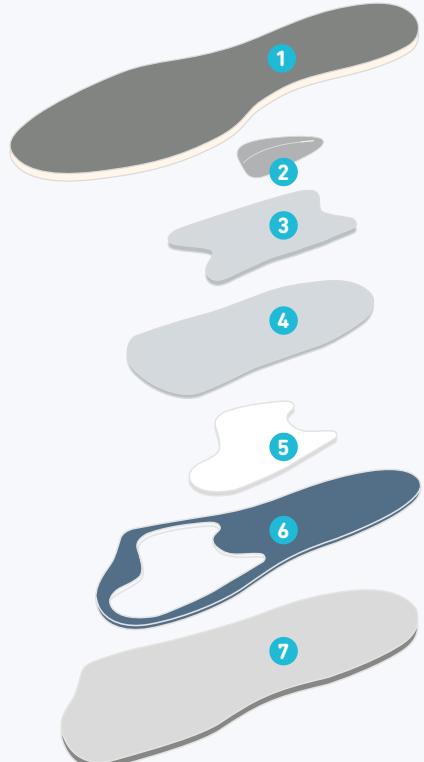

- Requires little modification
- The longitudinal arch support can be thermo-formed (hot air blower, 110 °C, 20–30 sec.)
- The pads can be freely positioned in versions that are open at the front

### CLEANING / CARE

- Surfaces can be wiped clean using a mild cleanser and a sponge
- Not machine-washable
- Do not expose to direct heat (heater, direct sunlight)
- We recommend that the functional properties are checked after six months

## THE DESIGN IN DETAIL

- 1 TOP COVER AND PUR CUSHION LAYER**  
High-quality microfiber top cover; shock-absorbing PUR cushion layer
- 2 METATARSAL PAD**
- 3 BUTTERFLY CORE**  
optimal support for the metatarsal area without allowing the foot orthosis to become torsion-resistant
- 4 ORTHOTIC CORE**
- 5 REINFORCEMENT ELEMENT**  
provides relief for the painful area; prevents supination misalignment of the forefoot; avoids levering out of the shoes
- 6 FRAME**
- 7 BOTTOM COATING**  
Tried-and-tested grip film – non-slip, flexible layer in contact with the shoe

**Glued versions, long**

# ErgoPad® work orthotic blanks\*

## ErgoPad® work:h+

## ErgoPad® work:h

- Moderate support for flattened foot arches, in cases of foot, knee or back pain, if required
- For (work-related) strain on the locomotor system while standing, walking, or carrying heavy loads, and with excessive physical strain or premature muscle fatigue
- Suitable for work and safety shoes as well as leisure and comfort shoes
- Synthetic orthotic core with hole notches and an intelligent fan design for relieving the plantar aponeurosis
- Adequate orthopedic support for the foot arches and the musculoskeletal system
- Cushioning areas with durable elasticity under the heel and the lateral midfoot and forefoot area
- Stabilizing heel cup for improved hindfoot stability
- ESD-conductive orthotic blanks

## USES

## FEATURES

## INFORMATION

## MODIFICATIONS

## CLEANING / CARE

Applies for both foot orthoses versions

### LEGAL NOTE

The supply and use of foot orthoses for work safety footwear are subject to safety specifications in accordance with DIN EN ISO 20345 as well as DIN ISO 61340 because of possible ESD conductivity. Please check with the manufacturer of the work safety footwear whether the required type testing has been carried out. Bauerfeind cannot answer this question because shoe collections change and there are many manufacturers.

When manufacturing the foot orthoses for work safety footwear, the relevant instructions for use for processing the specific orthotic blanks must be complied with to prevent risks that may arise when the shoes are being worn. This compliance forms the basis for type testing performed by shoe manufacturers. Non-compliance with relevant specifications contained in the instructions for use results in the exclusion of any warranty claims associated with this.

## THE DESIGN IN DETAIL

### ErgoPad® work:h<sup>+</sup>

#### 1 TOP COVER AND CUSHION LAYER

Conductive PUR cushion layer with polyester top cover, ESD-conductive foam

#### 2 TEAR-SHAPED METATARSAL PAD

Supports the plantar arch behind the metatarsophalangeal joints

#### 3 SYNTHETIC CORE – RELIEF CORE TECHNOLOGY

Cut out in the heel area with heel pad for additional cushioning and plantar fan design to relieve the irritated plantar aponeurosis

#### 4 BOTTOM COATING

Tear-resistant and conductive bottom coating

## THE DESIGN IN DETAIL

### ErgoPad® work:h

#### 1 TOP COVER AND CUSHION LAYER

ESD conductivity based on carbon fibers woven into the polyester top cover

Soft cushion layer made of ESD-conductive foam (5 mm forefoot and heel cushioning)

#### 2 ANATOMICALLY CONTOURED METATARSAL PAD

supports the natural arch of the foot behind the metatarsophalangeal joints

#### 3 SELF-SUPPORTING SYNTHETIC CORE

Cut out in the heel area for additional cushioning; fan design on the sole to relieve the irritated tendon path (study results substantiate the high level of effectiveness of the orthotic core in terms of pain reduction – orthotic treatment for plantar fasciitis, study conducted by Prof. Dr. med. Markus Walther)\*

#### 4 BOTTOM COATING

maximum, non-slip contact surface between the foot orthosis and the shoe; made of conductive EVA

\* Walther, Markus et al.: Effect of different orthotic concepts as first line treatment of plantar fasciitis.  
In: Foot And Ankle Surgery, Vol. 19, Nr. 2, June 2013, S. 103-107

## Secosol® dynamic

The certified foot orthosis  
for safety footwear

Certified shoe  
models:

The Secosol dynamic orthotic blanks have been optimized for use in work safety footwear. They relieve the feet during all standing activities. With a slight heel cup, a longitudinal arch support in the low and mid versions, and a metatarsal pad to relieve the forefoot, they support the feet and ensure secure footing. The orthotic blanks are thermo-formable and can therefore be individually adapted to the feet.

The certified shoe models are listed on the **Secosol shoe finder**.

Bauerfeind and  
Hartmann Orthopädie+Sport GmbH  
are retail partners.

# GloboTec® Patricia®

**GloboTec® Patricia®**  
Half-cup leather blank, long-sole

**ITEM NUMBER**  
3 11062 5 00000\*\*

## USES

- For supporting flattened or slightly raised foot arches
- Suitable for people with a normal body weight
- Suitable for business and leisure shoes with limited space inside

## FEATURES

- Flexible injection-molded orthotic core
- Thin materials, available in long-sole and short-sole versions
- Very thin at the heel and the edges
- Selected models feature a stabilizing heel half-cup

## INFORMATION

### MODIFICATIONS

- Partially thermo-formable Patricia® core (hot air blower, 130–150 °C, approx. 30 sec.)
- Easy to glue (standard workshop adhesives)

### CLEANING / CARE

- Surfaces can be wiped clean using a mild cleanser and a sponge (except leather top covers)
- Not machine-washable
- Do not expose to direct heat (heater, direct sunlight)
- We recommend that the functional properties are checked after six months

<sup>2</sup> Double sizing

# GloboTec® PP-Flex (Polyflex)

**ITEM NUMBER**  
3 09339 1 03999\*\*

## USES

- For supporting flattened or slightly raised foot arches
- Suitable for people with a normal body weight

## FEATURES

- Synthetic orthotic cores with various support functions
- Thin materials, available in long-sole and short-sole versions
- Thin at the heel and edges, some available with a stabilizing heel cup

## INFORMATION

### MODIFICATIONS

- The core is partially or completely thermo-formable (hot air blower or oven, 130 to 150 °C, 30 to 60 sec. for partial thermo-forming, approx. 3 to 4 min. for complete thermo-forming)
- Easy to grind (grinding belt, grit 60–100, polishing brush on the blade disk)
- Can be glued to other materials (standard workshop adhesives)

### CLEANING / CARE

- Surfaces can be wiped clean using a mild cleanser and a sponge
- Not machine-washable
- Do not expose to direct heat (heater, direct sunlight)
- We recommend that the functional properties are checked after six months

TOP COVER	CUSHION LAYER	METATARSAL PAD	VERSION	SIZE (**)	ITEM NUMBER

# ErgoPad® system:s

**ITEM NUMBER**  
3 28050 5 35864\*\*

## USES

- ErgoPad system:s offers a special base layer for every common foot misalignment:
- Base layer A: Mild arch decreased / splay foot
- Base layer B: Mild arch decreased foot
- Base layer C: Pronounced (valgus) arch decreased / splay foot
- Base layer D: Pronounced (valgus) arch decreased / splay foot with chronic heel and ankle pain
- Base layer E: Mild to moderate pes cavus / high arched foot

## FEATURES

- Available in both unglued and glued versions
- Different top layer groups
- Standard shoe shape

## INFORMATION

### MODIFICATIONS

- Requires little modification
- Easy to grind (grinding belt, grit 40–100, polishing brush on the blade disk)
- Easy to glue (standard workshop adhesives)
- Thermo-forming possible at approx. 80–100 °C, for approx. 30 sec.

Please note: Material shrinkage possible!

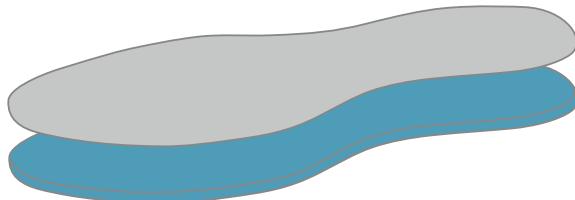

### CLEANING / CARE

- Surfaces can be wiped clean using a mild cleanser and a sponge and / or a suitable disinfectant
- Not machine-washable
- Do not expose to direct heat (heater, direct sunlight)
- We recommend that the functional properties are checked after six months

## THE DESIGN IN DETAIL

- 1 TOP COVER
- 2 CUSHION LAYER
- 3 METATARSAL PAD
- 4 THERMOPLASTIC REINFORCEMENT
- 5 BASE LAYER

## USES

- Soft foam orthotic blank for functional cushioning and relief
- For treatment of various foot deformities
- Depending on the cushion layer / base layer combination, suitable e.g. for sport and leisure activities, treating pressure-sensitive feet and in the case of diabetic foot syndrome or rheumatoid foot deformities
- For leisure and comfort shoes

## FEATURES

- Adequate orthopedic support for the foot arches
- Can be adapted to suit a wide range of foot proportions and shoe shapes
- Base layer and cushion layers available with different levels of density

## INFORMATION

### MODIFICATIONS

- Must be ground (foot orthosis shape at the sides and foot orthosis thickness)
- Easy to grind (grinding belt, grit 40–100, polishing brush on the blade disk)
- Easy to glue (standard workshop adhesives)
- Partially or completely thermo-formable (hot air blower or oven, up to 120 °C, approx. 20–30 sec. for partial thermo-forming, approx. 2 min. for complete thermo-forming)

Please note: Material shrinkage possible!

### CLEANING / CARE

- Surfaces can be wiped clean using a mild cleanser and a sponge (except leather top covers)
- Not machine-washable
- Do not expose to direct heat (heater, direct sunlight)
- We recommend that the functional properties are checked after six months

MILLED ORTHOSES

# MILLED ORTHOTIC BLANKS

## PERFECT CUSTOM-MADE FOOT PRODUCTS

MILLED ORTHOTIC  
BLANKS

# BODYTRONIC® ID:CAM

## YOUR PERSONAL TOOLBOX

Turn individual customer requests into reality with Bodytronic ID:CAM.

Using the BODYTRONIC ID:CAM system solution, you can model customized milled orthoses that offer a precise fit.

### SELECT THE PROFILE THAT SUITS YOU

#### **BASIC** BAUERFEIND FULL SERVICE

- You send the necessary customer data and information concerning the material, shape and shoe size.
- Bauerfeind takes over the modeling and manufacture of the milled orthoses for you.

#### **ADVANCED** BAUERFEIND VALIDATION SERVICE

- You carry out the modeling process based on the customer data using an integrated model and module library.
- Bauerfeind manufactures your milled orthoses after verification.

#### **PROFESSIONAL** BAUERFEIND MANUFACTURING SERVICE

- You perform the configuration and modeling yourself and then send the order online directly into the production.
- Bauerfeind manufactures your custom-milled orthoses without checking them beforehand.

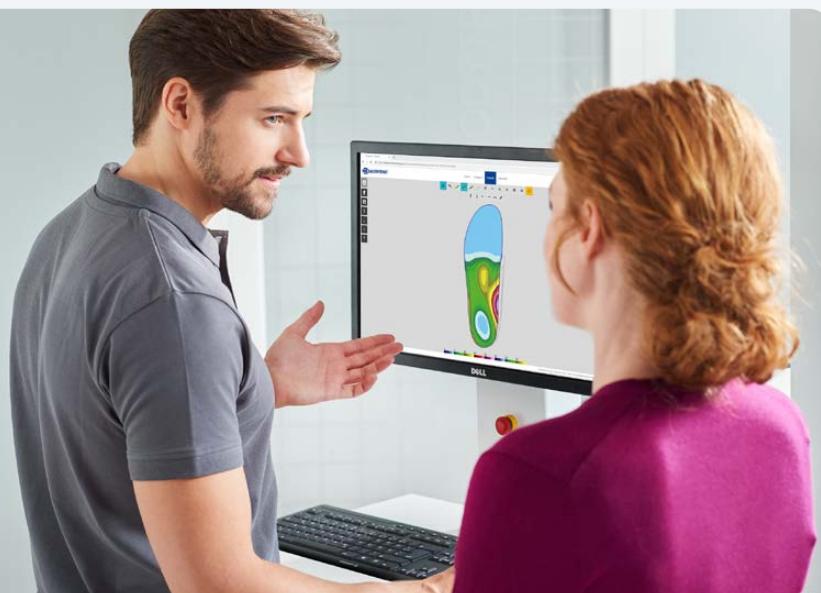

The free web application is available 24 / 7 at [idcamrev2.bauerfeind.com](http://idcamrev2.bauerfeind.com)

# YOUR BENEFITS AT A GLANCE

- **PERSONALIZED CONSULTATION ADAPTED TO PATIENT NEEDS**  
using comprehensive digital medical history form
- **INDIVIDUALIZED MODELING PROCESS**  
thanks to user-based template library
- **NOTICEABLE TIME SAVINGS**  
thanks to clear and intuitive user interface as well as personal library

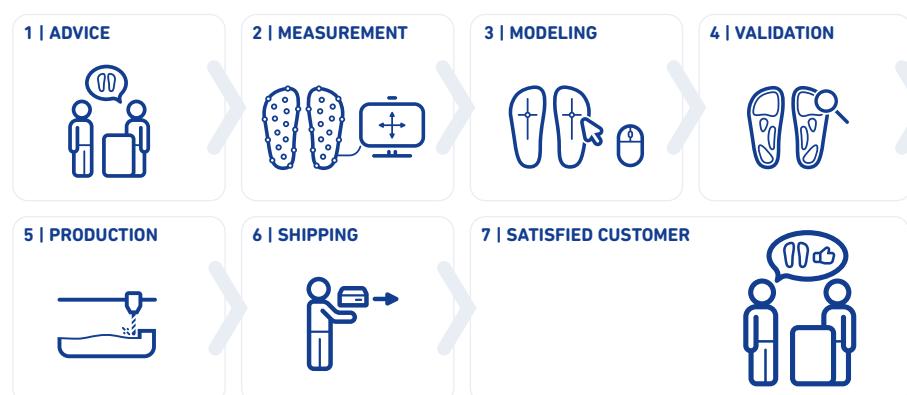

- **FAST AND TAILORED CUSTOMER CARE**  
thanks to foot orthosis delivery within 48 hours
- **COMPREHENSIVE OPTIONS FOR HIGHLY SPECIALIZED PRODUCTS**  
thanks to different modeling modules for the treatment of adults, children and patient with diabetes, including plus sizes and customized milled foot orthoses with core element
- **MODELING OF DIABETES-ADAPTED FOOT CUSHIONING** by using a digital last in the diabetes module
- **USE OF ALL CONVENTIONAL RECORDING METHODS**  
based on the upload of different data (2D, 3D, foot pressure measurement)
- **MATERIAL SELECTION ADAPTED TO INDIVIDUAL CUSTOMER NEEDS**  
thanks to a huge choice of single-, dual- and triple-layer materials with different degrees of density

MILLED ORTHOTIC  
BLANKS

## MEASURE – MODEL – VALIDATE

You can decide which stages of the foot orthosis production process you want to participate in. If you like, Bauerfeind can take the digital measurement data and start modeling and manufacturing the milled orthoses straight away.

# ErgoPad® ID:

## USES

- BODYTRONIC ID:CAM is Bauerfeind's concept for manufacturing precisely milled customized foot orthoses to suit your specific indication and foot care requirements.
- Orthoses are created using an intuitive and free web application offering three different user profiles
- Based on 2D data (scan, blueprint), foot pressure measurement data and 3D data (imprint foam scan)
- Suitable for comfort, leisure and sports shoes, depending on the configuration of the foot orthosis

## FEATURES

- Thanks to the wide variety of material combinations available, a solution can be found for every foot problem
- The integrated and freely modifiable model and module library helps you create customized milled foot orthoses quickly and efficiently
- Manufactured using precise CNC milling machines and deliverable / delivered within a short time
- Forefoot and / or heel intarsia (cushions) can be incorporated into the foot orthosis
- Foot orthoses are also available with a top cover (microfiber / lambskin leather)
- Further processing by an orthotist is required
- Can be delivered pre-ground at the sides

## INFORMATION

### MODIFICATIONS

- Must be ground (to fit the shoe / side of the foot if required)
- Easy to grind (grinding belt, grit 60–100, polishing brush on the blade disk)
- Easy to glue (standard workshop adhesives)
- Partially thermo-formable (hot air blower, up to 120 °C, 20–30 sec.)
- Avoid attempting large-scale thermoforming
- A top cover, e.g. microfiber, is recommended for mechanical protection of the soft foam material

### CLEANING / CARE

- Surfaces can be wiped clean using a mild cleanser and a sponge (except leather top covers)
- Not machine-washable
- Do not expose to direct heat (heater, direct sunlight)
- We recommend that the functional properties are checked after six months

DESCRIPTION	INNER SOLE SHAPE	BASE THICKNESS	FOREFOOT MODULES	MIDFOOT MODULES	SIZE
ID:Trend With its <b>moderate arch supports</b> , this predesign is a perfect starting point for treating high-arched / arch decreased feet or splay feet	For comfort shoes	3.5 mm	None	Metatarsal pad (long), medial arch support (long)	35–50
ID:Trend Dynamic With its <b>proprioceptive modules</b> , this predesign provides a good basis for stimulating the foot muscles and thus actively correcting misalignments	For comfort shoes	3 mm	Toe bank	Metatarsal pad (large), medial arch support (long), lateral arch support (short)	35–50
ID:Style The <b>moderate arch supports</b> are the perfect starting point for treating high-arched / arch decreased feet or splay feet; preselected <b>lateral arch supports</b> allow easy adaption to combat excessive supination; the thin <b>forefoot area</b> makes shortening of the foot orthosis easy	For comfort shoes	1.5 mm	None	Metatarsal pad (long), medial arch support (short), lateral arch supports (long)	35–50
ID:Style Dynamic With its <b>proprioceptive modules</b> , this predesign provides a good basis for stimulating the foot muscles and thus actively correcting misalignments; thanks to its <b>low forefoot height</b> , it's perfect for shoes with little space in the toe area	For comfort shoes	1.5 mm	Toe bank	Metatarsal pad (large), medial arch support (short), lateral arch support (short)	35–50
ID:Fit The <b>moderate arch supports</b> are a perfect starting point for treating high-arched / arch decreased feet or splay feet	For standard shoes	3.5 mm	None	Metatarsal pad (long), medial arch support (long)	35–50
ID:Fan Cup The <b>high heel cup</b> holds the heel in a secure position and is a good basis for treating high-arched / arch decreased feet or splay feet	For standard shoes	2.5 mm	None	Metatarsal pad (long), heel cup (long)	35–50
ID:Bodytronic 1 Slim feet with problems relating to high-arched, arch decreased or splay feet can be treated particularly well using <b>moderate arch supports</b>	Standard shoe shape, narrow	1.5 mm	None	Metatarsal pad (long), medial arch support (long)	35–48
ID:Bodytronic 2 Average-width feet with problems relating to high-arched, arch decreased or splay feet can be treated well using <b>moderate arch supports</b>	Standard shoe shape, medium width	1.5 mm	None	Metatarsal pad (long), medial arch support (long)	35–48
ID:Bodytronic 3 Wide feet with problems relating to high-arched, arch decreased or splay feet can be treated in a targeted manner using <b>moderate arch supports</b>	Comfort shoe shape, wide	1.5 mm	None	Metatarsal pad (long), medial arch support (long)	35–48
ID:Extra-wide This predesign has been specially developed for <b>extra-wide</b> and <b>high-volume feet</b> ; moderate valgus and arch decreased foot deformities can be treated in a targeted way; additionally, the wide contour allows fitting them into therapeutic shoes	Extra wide	1.5 mm	None	Metatarsal pad (long), medial arch support (long)	35–48

## ErgoPad® ID:

DESCRIPTION	INNER SOLE SHAPE	BASE THICKNESS	FOREFOOT MODULES	MIDFOOT MODULES	SIZE
ID:Trend Flat  With this predesign, this foot orthosis can be modeled completely <b>without a predefined topology</b> and thus tailored to customer needs	For comfort shoes	1.5 mm	None	None	35–50
ID:Toy  A predesign for the treatment of children with a high, <b>extended heel cup</b> and toe grip; a predesign is also available for treating children – ErgoPad ID: Toy Flat – which makes it possible to design a foot orthosis entirely <b>without any predefined topology</b>	For children's shoes	2 mm	Toe grip (long)	Metatarsal pad (long), heel cup (extended, high)	21–34
Diabetes 1  With its <b>moderate arch support</b> , this predesign is a perfect starting point for treating high-arched / arch decreased feet or splay feet	Comfort shoe shape (freely modifiable)	3.5 mm	None	Metatarsal pad (long), medial arch support (long)	35–50
Diabetes 2  The <b>moderate arch supports</b> are the perfect starting point for treating high-arched / arch decreased feet or splay feet; preselected <b>lateral arch supports</b> allow easy adaption to combat excessive supination; the <b>thin forefoot area</b> makes shortening of the foot orthosis easy	Comfort shoe shape (freely modifiable)	1.5 mm	None	Metatarsal pad (long), medial arch support (short), lateral arch support (long)	35–50
Diabetes 3  With its <b>moderate modules</b> , this predesign is a perfect starting point for treating high-arched / arch decreased feet or splay feet	Comfort shoe shape (freely modifiable)	3.5 mm	None	Metatarsal pad (long), medial arch support (long)	35–50
Diabetes 4  Thanks to its <b>moderate modules</b> , this predesign provides a good basis for treating <b>sensitive and injury-prone feet</b> ; a preselected <b>moderate heel cup</b> also ensures good foot guidance	Comfort shoe shape (freely modifiable)	8 mm	None	Medial arch support (short), heel cup (long)	35–50

### Additional features

DESCRIPTION	VERSION
Top cover	onSteam / microfiber / lambskin leather
Heel cushion	9.5 mm cushioning material
Forefoot / hindfoot intarsia	6 mm cushion material

# MILLED SPORTS FOOT ORTHOSES

## USES

- Designed to meet sport-specific requirements
- Biomechanically optimized support, stability and cushioning for the feet, knees, hip joints and spine
- Suitable for golf, inline skating, mountain biking, Alpine skiing and football
- Suitable for sports shoes

## FEATURES

- CNC-milled, multi-layered, horizontal soft foam blank
- Sport-specific design in accordance with biomechanical requirements
- Orthopedically effective support for the foot arches
- Can be adapted to suit a wide range of foot proportions and shoe shapes

## INFORMATION

### MODIFICATIONS

- Must be ground (to fit the shoe / side of the foot)
- Easy to grind (grinding belt, grit 60–100, polishing brush on the blade disk)
- Easy to glue (standard workshop adhesives)
- Top cover recommended, e.g. high-quality microfiber

### CLEANING / CARE

- Surfaces can be wiped clean using a mild cleanser and a sponge
- Not machine-washable
- Do not expose to direct heat (heater, direct sunlight)
- We recommend that the functional properties are checked after six months

## FROM NATURE TO YOUR SHOES

CORK ORTHOTIC  
BLANKS

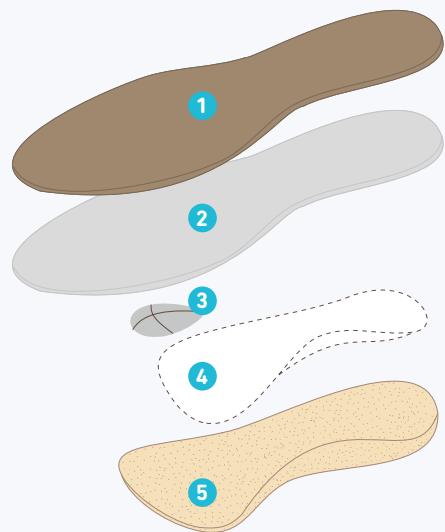

# GloboTec® Elastra-Cork

**ITEM NUMBER**  
3 02522 5 00000\*\*

## THE DESIGN IN DETAIL

- 1 TOP COVER
- 2 CUSHION LAYER
- 3 METATARSAL PAD
- 4 THERMAL REINFORCEMENT
- 5 CORK BASE LAYER

## USES

- Cork (and leather) orthotic blank to provide stable support for the foot arches
- Suitable for the treatment of typical foot deformities, e.g. arch decreased / splay foot
- A cushioning effect is also possible, depending on the type of cushion layer used
- Suitable for leisure and comfort shoes

## FEATURES

- Bauerfeind's proprietary combination of natural rubber and cork is lightweight, elastic and dimensionally stable
- Can be adapted to suit a wide range of foot proportions and shoe shapes
- Long-sole and short-sole blanks available
- Cork base available in various thicknesses and shapes, with or without a wooden spline
- High-quality, vegetable tanned sleek leather ensures better conditions within the shoe

## INFORMATION

### MODIFICATIONS

- Must be ground (foot orthosis shape at the sides and foot orthosis thickness)
- Easy to grind (grinding belt, grit 40–100, polishing brush on the blade disk)
- Easy to glue (standard workshop adhesives)

### CLEANING / CARE

- Not washable
- Do not expose to direct heat (heater, direct sunlight)
- We recommend that the functional properties are checked after six months

<sup>2</sup> Double sizing

A dynamic photograph of a woman with long, wavy brown hair, captured mid-dance against a clear blue sky. She is wearing a white, sleeveless, knee-length dress and white lace-up sneakers. Her arms are outstretched, and her legs are kicked high, conveying a sense of movement and freedom. The lighting is bright, creating a soft glow around her figure.

VISCO

# VISCOELASTIC FOOT ORTHOSES FOR COMBATING ACUTE PROBLEMS

# ViscoHeel®\*

## ViscoHeel® K\*

Medical aid no. ViscoHeel:  
08.03.06.0001

Supplied in pairs.

### USES

- For the acute treatment of achillodynia and Haglund's deformity (ViscoHeel), varus and / or valgus misalignment of the heel (ViscoHeel K)
- Reduces shock loads on the ankle, knee, hip, and spine
- Soft cushioning reduces pressure symptoms under the heel
- Can also be used as pronation or supination cushion (ViscoHeel K)

### FEATURES

- Viscoelastic, skin-friendly material
- Anatomically contoured
- Surface sloping at the sides (ViscoHeel K)

### INFORMATION

#### CLEANING / CARE

- Can be cleaned with lukewarm water and a mild detergent
- Do not expose to direct heat (heater, direct sunlight)

# ViscoSpot®\*

Medical aid no.:  
08.03.06.0008

## USES

- For the acute treatment of heel spurs and achillodynia
- Targeted pressure relief in the area of the softest material (white spot)
- Additional relief of the insertion of the plantar fascia (blue spot)
- Recess along the course of the fascia

## FEATURES

- Anatomical soft cushioning
- Smooth transition as a result of wavelike contours between the zones
- Reduces pressure at the edges
- Increased wearing comfort
- For use on either foot (with a compensating cushion for the other foot) or both feet

## INFORMATION

MATERIAL

# MATERIALS AND ADDITIONAL FEATURES

## INDIVIDUALITY THANKS TO CRAFTSMANSHIP

# PedoPrint® FOOTPRINT DEVICE\*

**ITEM NUMBER**  
3 60430 0 0000000

## USES

- Image of the load-bearing area on the sole of the foot and the foot outline
- Allows for conclusions to be drawn about foot deformities
- Working basis for the provision of foot orthoses and shoes

## FEATURES

- Traditional, portable footprint device for creating 2D footprints
- Available as a complete set including a rubber mat (with a grid pattern or plain), outline pen, ink roller, stamping ink (blue), 50 sheets of footprint paper, 10 sheets of protective film
- When the footprint device is used for a number of patients, the sheets of protective film ensure a better level of hygiene
- Individual components can also be ordered separately (see table)

## INFORMATION

### USE

- Use the ink roller to apply the ink thinly and evenly on one side of the rubber mat
- Put the sheet of footprint paper in place, attach the frame with the colored side of the rubber mat on the paper
- Position the foot on the clean side of the rubber mat and use the outline pen to draw round the foot at 90°
- Lift up the frame and remove the paper with the foot imprint
- Before taking a new imprint, ink must be reapplied to the rubber mat

### CLEANING / CARE

- It is recommended that a surface disinfectant is used regularly to clean the footprint device and rubber mat

# IMPRINT FOAM\*

**ITEM NUMBER**  
3 60450 1 0000000

## USES

- Image of the load-bearing area on the sole of the foot and the foot outline
- Allows for conclusions to be drawn about foot deformities
- Working basis for the provision of foot orthoses and shoes

## FEATURES

- Single-use PUR foam to create one pair of 3D foot imprints
- Available in a folding cardboard box, can be written on
- Imprint foam is available in the dimensions 325 x 145 x 38 mm and 325 x 145 x 50 mm (length x width x height)

## INFORMATION

### USE

- Open the imprint foam box
- If there are any wounds on the feet, cover them using sterile material
- With the patient either seated or standing, position one foot of the patient after the other on the foam and apply vertical pressure
- If necessary, mark the lateral line across the ball of the foot and the center of the ankle
- Remove the foot from the imprint foam and close the cardboard box
- To create foot orthosis lasts, plaster or last foam can be poured into the foam imprint

### Imprint foam

## MICROFIBER

### FEATURES

- Abrasion-resistant (Martindale tested in accordance with DIN EN ISO 12947)
- Comfortable, non-slip foot-side contact surface
- Polyester / polyethylene textile mix
- Selected products with silver ion coating
- Biocompatible in accordance with DIN EN ISO 10993-1

### INFORMATION

#### MODIFICATIONS

- Easy to cut with shears or knife (non-directional)
- Easy to glue (standard workshop adhesives)

#### CLEANING / CARE

- Wipe using a mild cleanser and a sponge
- Air dry
- Do not expose to direct heat (heater, direct sunlight)

# PLATE MATERIALS

## TECfom / TECmoll / TEClast / TECstrong

### USES

- Cushioning (TECfom, TECmoll) and construction (TECmoll, TEClast) materials for various types of foot orthosis
- For functional cushioning (TECfom, TECmoll), relief (TECfom) and support (TECmoll, TEClast)
- For sport, leisure and work

### FEATURES

- Closed-cell soft foam (EVA / PE) (TECfom: 25° Shore A\*; TECmoll: 35° Shore A\*; TEClast: 45° Shore A\*; TECstrong: 50°–55° Shore A\*)
- Available in various thicknesses
- Biocompatible in accordance with DIN EN ISO 10993-1

### INFORMATION

#### MODIFICATIONS

- Trimmable (sole leather shears / knife; saw can also be used for TECmoll and TEClast)
- Thermo-formable (TECfom / TECmoll: 80 to 120 °C hot air blower / oven; TEClast: 100 to 140 °C hot air blower / oven)
- Please note: Material shrinkage possible!
- Easy to grind (grinding belt: grit 24–100, pumice stone, blade disk)
- Easy to glue (first roughen extensively, standard workshop adhesives)

#### STORAGE

- Store hanging or lying
- Store at 10–25 °C
- Store in a dry place, do not expose to direct heat (heater, direct sunlight)

# ADDITIONAL BAUERFEIND PRODUCT CATEGORIES

## VenoTrain COMPRESSION STOCKINGS

are characterized by clinically proven effectiveness and unique material properties. They improve venous activity and counteract venous leg problems. For both mild to moderate and advanced vein problems, as well as for work or travel, the VenoTrain product range offers a suitable stocking. They can easily be combined with various styles, thanks to a wide range of colors and designs.

## BAUERFEIND'S SUPPORTS AND ORTHOSES

help after injuries as well as with acute and chronic orthopedic conditions.

They improve the feeling of stability and provide confidence during everyday activities and exercise. The supports and orthoses are made from lightweight and breathable materials to perfectly underpin therapeutic exercise.

They are easy to handle during everyday use, thanks to innovative solutions, such as quick-fit fasteners and integrated donning aids, and will win you over with their premium quality.

## COMPRESSION STOCKINGS FOR EDEMA TREATMENT

Every day is more pleasant when you feel good. That is why the flat knit, custom-made VenoTrain® curaflow compression stockings were developed. This versatile and colorful product perfectly adapts to the individual shape of the lymphedema or lipedema patient's legs, arms, hands, or thorax. VenoTrain® curaflow provides noticeable relief so patients can live their everyday lives feeling carefree, confident, and attractive.

MEDICAL AIDS  
HAVE BEEN  
PROVEN TO BE  
EFFECTIVE\*

\* Supports / orthoses, compression stockings and foot orthoses help patients get back on their feet quickly after an injury or in case of disorders.

(Source: representative patient survey conducted by the Allensbach Institute for Public Opinion Research on behalf of eurocom e.V., 2023, n=n=1,300 users of supports / orthoses, compression stockings, and foot orthoses)

# BAUERFEIND AG TERMS AND CONDITIONS OF SALE AND DELIVERY (GTC)

## VALID FOR: GERMANY

### Prices

The prices quoted are net prices in Euros ex works and do not include statutory VAT.

### Shipping

Shipping is at the risk and on the account of the purchaser, even if the purchaser does not bear the costs of transportation. Business interruptions affecting us or any of our suppliers, lack of suitable personnel, strikes, lockouts and force majeure are causes for extending delivery times and relieve us of any delivery obligation for the duration of the hindrance.

### Shipping costs

We calculate our shipping costs as a flat rate of EUR 7.00 for a net total order value of up to EUR 50.00, and EUR 4.00 for a net total order value of up to EUR 200.00. No shipping costs need to be paid for custom-made solutions. Special shipping requirements will be charged at cost.

### Returns

Returns are only accepted outside the warranty terms if we have been notified in advance and approved the return (notification) with inclusion of the shipping documents and under the assumption that the returned goods are in faultless condition. We reserve the right to reject any returns.

Except where covered by warranty, we charge for processing returns. For returns within one month of the delivery date, this charge is EUR 10.00 for each return. For goods returned one month or more after the delivery date, a handling fee of 20 percent of the net order value, or a maximum of EUR 25.00 per product and unit, is charged; for returns six to twelve months after the delivery date, the fee is 40 percent of the net order value, or a maximum fee of EUR 50.00 for each product and unit.

Except where covered by warranty, no returns, including, but not limited to, custom-made orders, will be accepted after twelve months following the delivery date.

### Payments

Payments are due immediately following delivery. We offer a 4 percent discount for payments made by direct debit and a 3 percent discount for payments made within ten days of the invoice date. Otherwise, the payment terms are 30 days net. The buyer shall be considered in arrears once 30 days have passed from the invoice date. From this point on, any further deliveries will only be made against advance payment.

From the date the customer is in arrears, we will charge default interest of 8 percent above the applicable base interest rate. Payments by check, bank draft, etc. are deemed to be made only when the amount has been credited fully and irrevocably to our account.

### Retention of ownership

We retain the proprietary rights to all of the delivered goods until the purchaser has settled all of the outstanding accounts due to us as a result of the business relationship. The retention of title shall also apply pro rata if the goods in question have been processed or modified. If the goods are resold, all third-party claims arising therefrom shall be transferred to us without reservation up to the total amount owed to us. Notwithstanding the assignment, the buyer is entitled to the collection of these amounts. Our right to collect the amounts is not affected by the preceding provision; however, we undertake to refrain from collection unless the buyer defaults on payment. If the buyer defaults on payment, we can demand that the buyer disclose the assigned claims and the names of the debtors, provide all information required for collection of the debt, deliver all required documents and inform the debtors (third party) of the assignment.

The buyer shall not be entitled to pledge or assign the goods as security. The buyer shall notify us without undue delay about any seizures, confiscations, or any other dispositions taken by a third party, and shall make available all information and documents necessary for us to defend our rights.

We undertake to release the security owed to us at the buyer's request to the extent that its value does not exceed that of the claim to be secured by more than 20 percent and provided the claim in question has not yet been settled.

### Complaints

Warranty claims in respect of obvious defects shall be void if we do not receive immediate written notification of these claims in accordance with Section 377 of the German Commercial Code (HGB). In all other cases, the period for warranty claims is one year after handing over the purchased goods. If the goods are defective, we may replace or repair the goods at our discretion. For reasons of hygiene, repairs will only be performed on products that have been washed or are completely hygienic. Upon receipt of unwashed goods, we reserve the right to claim a suitable sum for additional work. Provided that we fulfill our

supplementary performance obligations, especially in regard to rectifying defects or delivering a defect-free product, the customer has no right to demand a price reduction or to withdraw from the contract, unless we fail to deliver our supplementary performance. Defects which are caused by normal wear and tear, overuse, misuse, or neglect of care are not covered by warranty.

### Liability

We are liable only in cases of gross negligence and intent as well as for breaching obligations that make the proper performance of the contract possible in the first place and on the compliance with which the buyer may regularly depend ("material obligations").

Regarding the negligent violation of a material obligation, our liability is limited to damages that are foreseeable when the contract is signed and that are typical of this kind of contract.

We are not liable for the negligent violation of contractual obligations which are not material obligations.

Provided that our liability is limited or excluded, this shall also apply to the liability of our employees, representatives, or vicarious agents.

The liability limitations or exclusions above do not apply in cases of fraudulent concealment of defects, assumption of a guarantee or procurement risk, for liability based on the Product Liability Law, as well as for physical injuries (injury to life, limb, or health). No change of burden of proof to the disadvantage of the buyer is associated with this provision.

### Applicable law and place of jurisdiction

These Terms and Conditions shall be governed by the laws of the Federal Republic of Germany, excluding the United Nations Convention on Contracts for the International Sale of Goods (CISG).

The place of jurisdiction for all disputes resulting from or associated with this contract shall be Gera, provided that the buyer is a legal entity under public law or a special fund under public law within the meaning of the German Commercial Code. However, we are also entitled in all cases to file suit at the place of fulfillment or at the general jurisdiction of the user. Overriding legal regulations, particularly regarding exclusive jurisdictions, remain unaffected.

The place of performance for the delivery is our company headquarters.

### Severability clause

If a provision in these Terms and Conditions is or becomes fully or partly void, ineffective or unenforceable ("Flawed Provision"), the effectiveness and the enforceability of the remaining provisions in these Terms and Conditions will not be affected. The parties agree at this time to find a provision instead of the flawed provision that, within the limits of what is legally possible, is as close to what the parties would have agreed for the meaning and purpose of this provision if they had known that the provision was flawed. If the inaccuracy of the provision is based on a measure of performance or time (period or deadline) specified therein, the provision must be agreed with a legally permissible measure that most closely reflects the original measure. The same applies to potential loopholes in these Terms and Conditions. This severability clause does not entail the mere reverse onus, but also waives Section 139 of the German Civil Code in general.

### Written form

Changes and / or additions to these Terms and Conditions must be made in writing to take effect (handwritten signature); this shall also apply to any changes and additions to this written form requirement.

### Data protection clause / conversation recording

For quality purposes, we randomly record calls between the buyer and our employees. The phone recordings solely serve the purpose of improving our service and are deleted after evaluation. The data will not be disclosed to third parties. The buyer hereby consents to the recording of telephone calls for that sole purpose. Consent is voluntary and may be revoked by the buyer at any time with effect for the future.

Please see [www.bauerfeind.de/ds](http://www.bauerfeind.de/ds) for further information on the latest version of Bauerfeind AG's General Data Protection Policy.

# A BETTER QUALITY OF LIFE FOR YOUR CUSTOMERS!

## **Disclaimer**

All information in this brochure is up to date at the time of printing. This brochure – depending on its version – gives an initial insight into this area of expertise, and suggests selected medical diagnosis and treatment options. Even though the details are scientifically substantiated, we do not claim that all information is complete or that all schools of thought are represented. All contents in this brochure or its online version, including extracts, in particular those about diagnostics and treatment options (texts, images, graphs, etc.), are understood as non-binding support for the treatment that must be chosen by a physician or professional. This brochure is no substitute for the necessary personal medical history and its overall assessment by a physician/professional, considering ongoing treatment, if applicable. The contents in this brochure are exclusively designed for professionals, not for anyone unrelated to the subject, in particular not for patients. If in doubt, please seek additional advice from a specialist. We are also happy to help.
